

1 Introduction

This document describes the "NemID privat til erhverv"/"NemID private to business" service available through the TU Services platform.

2 Requirements

One of our TU Services clients. If the TU Services client does not support the API methods yet on your platform, write to support@signaturgruppen.dk to let us know.

3 NemID private to business

The NemID private to business service, lets private and public organisations retrieve a list of CVR numbers + company names, from a specific CPR number.

The official site is found here: <https://www.digst.dk/It-loesninger/NemLogin/NemID-privat-til-erhverv>

The TU Services platform has support for the service through the TU Services clients and is available as a paid feature.

4 Example usage

The service is called in .Net using:

```
var cvrInfo = new CvrInfoService().LookupCvrInfo(cpr);
var serializedJson = JsonConvert.SerializeObject(cvrInfo);
```

The following is an example of the output in JSON produced by our implementation.

```
{
  "cprnr": null,
  "sidstOpdateret": "2015-02-03T20:00:00.000Z",
  "nemLoginPersonLoginTilladtListe": [{
    "cvrnr": "44391414",
    "navn": "BOHNSTEDT-PETERSEN ÅRHUS A/S"
  }, {
    "cvrnr": "33654545",
    "navn": "Puk Gaston Design"
  },
  ...
]
```
